

8.38mm laminated glass with euro grey pvb manufacturer china

8.38mm euro grey pvb Laminated glass

8.38mm euro grey pvb laminated glass, it is produced by two layers of [4mm clear float glass](#) permanently bonded together with a layer of 0.38mm euro grey pvb film via a controlled, highly pressurized and industrial heating process. It is the safety glass, if it is broken, the splinters will stick to the interlayer and not scatter.

The advantage of Laminated glass

1. Anti-UV: Laminated glass can effectively prevent UV.
2. Sound insulation: High quality PVB film can effectively prevent sound waves.
3. Safety: when the laminated glass is attacked by outside force, it is hard to be penetrated because PVB film has strong tenacity and can absorb and weaken a mass of striking energy. Even if it is broken, the broken glass will not fall down, still stick to the interlayer.
4. Dynamic colors: color laminated glass offers total flexibility, providing the personal touch of unique colors, also affords different levels of translucency for visual screening, like [F-green PVB laminated glass](#), Euro grey PVB laminated glass, other Laminated glass with customized color PVB film.

The features of 8.38mm euro grey PVB laminated glass
