

## **Grey,bronze,blue,green color tempered curved glass,tinted bending glass manufacturer**

Color tempered curved glass is made by heating [tinted annealed glass](#) to approximately 700° Celsius then cooling the outer surfaces rapidly. This process makes the glass very strong and shock resistant thus more durable. Bent glass, curved glass uses this toughening technique and computer control radius, provided tinted curved tempered glass allows us to provide curved glass solutions for a wide range of applications in architectural, commercial and residential installations.

### **Why choose color tempered curved glass?**

Tinted glass raw characteristic is low UV transmittance rate, good sunshade efficiency, reducing solar glare and heat transmission, so it can protect furniture and furnishings from fading and energy saving. In other way, our company supply 8 color options for client choose, people can find something they like, decorate building inside or outside. Tinted curved glass will have more usage because of it is a safety glass, and can custom design radius for accurate,
